GATEDP Funding

GATEDP is funded by a surcharge assessed on all Georgia residential and business land based phone lines. The Georgia Public Service Commission oversees the surcharge assessment process and funding distribution.

The mission of the Georgia Public Service Commission is to exercise its authority and influence to ensure that consumers receive safe, reliable and reasonably priced telecommunications, electric and natural gas services from financially viable and technically competent companies.

WHY WE DO WHAT WE DO...

Access to specialized telecommunication equipment is a central struggle for those dealing with hearing loss and/or speech impairment. Yet, many people are unaware of State programs such as ours that offer free equipment to individuals who qualify. Since 2004, the Georgia Telecommunication Equipment Distribution Program (GATEDP) has worked to provide all of the re¬sources needed and to increase awareness of our program. Providing equipment training and excellent customer service is truly our goal. Helping people, helping families and making a difference in the lives of our clients is without a doubt … why we do what we do!!

Alan L. Sherman
